

# Cynomolgus IL-2 R gamma/CD132 Protein

Cat. No. CD1-CM132

## Description

<b>Source</b>	Recombinant Cynomolgus IL-2 R gamma/CD132 Protein is expressed from HEK293 with His tag at the C-Terminus. It contains Leu23-Asn254.
<b>Accession</b>	Q38JL2
<b>Molecular Weight</b>	The protein has a predicted MW of 28.2 kDa. Due to glycosylation, the protein migrates to 50-68 kDa based on Bis-Tris PAGE result.
<b>Endotoxin</b>	Less than 1EU per µg by the LAL method.
<b>Purity</b>	> 95% as determined by Bis-Tris PAGE

## Formulation and Storage

<b>Formulation</b>	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
<b>Reconstitution</b>	Centrifuge the tube before opening. Reconstituting to a concentration more than 100 µg/ml is recommended. Dissolve the lyophilized protein in distilled water.
<b>Storage</b>	-20 to -80°C for 12 months as supplied from date of receipt. -80°C for 3 months after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

## Background

The gamma chain of the high affinity functional human IL-2 receptor complex belongs to the hematopoietin receptor family. IL-2 R gamma is a 369 amino acid residue protein consisting of a 22 residue signal sequence, a 232 residue extracellular domain, a 29 residue transmembrane domain and an 86 residue cytoplasmic domain. Although IL-2 R gamma by itself does not bind IL-2 with any appreciable affinity, it is required for IL-2 receptor signaling.

## Assay Data

### Bis-Tris PAGE

Cynomolgus IL-2 R gamma on Bis-Tris PAGE under reduced conditions. The purity is greater than 95%.
